Dear Customers and Friends

The month of April did not see very much local action packed racing, with the Production cars being cancelled at Phakisa. The Production car series got going again in Port Elizabeth on Saturday 1st May and following that the Super Series at Phakisa on Saturday 22nd May.

According to the Gauteng provincial gazette in December 2009 all Gauteng number plate formats are going to be changed starting from December of this year. The new format will be 2 letters, 2 numbers, 2 letters followed by the Gauteng coat of arms and the letters GP. (bb11bb*gp)

Each number plate will have unique barcodes and electronic chips.

Unfortunately it seems that personalized number plates will be a thing of the past. This system will be phased in over a period of 2 years. Depending on what letter your number plate starts with will depend on when you have to make the change. I guess this means more money out of the motoring public's pocket again and definitely long lines at the licensing department.

Last month we promised you some exciting new information on our **Latest** Supercharger conversion for the Prado 4.0 v6 , read on

With RGM's major success in supercharging recreational vehicles we recognized that the new Toyota Prado Dual VVTi was definitely a great candidate for the RGM supercharge conversion.

Having completed a number of supercharge conversions on its predecessor the development team gathered around the table to plan a completely new development.

Our in-house design division utilizing sophisticated CAD design programs came up with a design with emphasizes on durability, reliability and presentation allowing us to complete this aesthetically pleasing conversion in 10 working days.

The net result is a conversion that is not only exceptionally pleasing to the eye but also delivers in its expectations of increasing horsepower substantially.

326Kw of power & 540 Nm of torque

Please follow the link below for more info on this latest state of the art development from RGM

From Our Service Division

We at RG Motorsport offer all our existing clients and new friends a comprehensive motor experience, the service division being one of the divisions of the business.

The service division comprises of five technicians

The Service Division offers a variety of products and services. The three types of services that we offer are as follows:

The Minor Service

This is the basic of all the services. It involves an oil change and full safety check.

The Major Type 1 Service

This service includes changing the oil filter and oil; air filter; plugs and a full safety check.

The Major Type 2 Service

Includes all parts from Major Type 1 services including flushing the cooling system and changing the gearbox & diff oils.

We also offer additional services such as general checks, safety checks and general electronic diagnostics. We also do all the maintenance to the RG Motorsport conversions.

We at the service division believe that there are benefits to servicing and maintaining a vehicle regularly. This extends the life span of the vehicle as

well as enhancing its reliability. In today's economy regular servicing saves money and hassles by preventing avoidable breakdowns and unnecessary maintenance. Servicing provides a safety aspect for your loved ones as this prevents avoidable breakdowns.

Justin Spurr

Workshop Manager

Service Division

RGM service division would like to invite all our customers that are driving vehicles under Motor plan or warranty to make use of our " 4 hour check over" before your motor plan expires. We will give you a full report of any work or maintenance that needs to be done by your dealer. Contact Willem for your booking
